TOMORROW'S CITIES, TODAY'S INNOVATORS

In the evolving world of design, here's how Sahir and Sarah Choudhary, the sibling duo at Habitat Architects redefine what it means to create for a global and conscious generation

As the leaders of Habitat Architects, Sahir and Sarah Choudhary are building on the legacy established by their parents, Monika and Zafar Choudhary. With their holistic education, multidisciplinary approach and commitment to sustainability, together, they are crafting a bold and visionary future. For Sahir and Sarah, the future of architecture lies at the intersection of heritage and innovation. "We are not just designing spaces," they express. "We are designing experiences that last."

BUILDING FROM THE BEGINNING

Sahir and Sarah's journey into architecture and design was nurtured from a young age. Excelling in their alma maters, these institutions became the launchpad for their ventures into urban architecture. Sahir's journey at Doon School where his involvement in theater as both a performer and a production designer nurtured his ability to think creatively. He reflects, "Theater taught me how every element in a space contributes to an overarching story—

be it light, texture, or form."

Specialising in Virtual Reality (VR) and Artificial Intelligence (AI) at Cornell University, Sahir delved into creating adaptable and sustainable cityscapes within the field of architecture. "Design should not only solve today's problems but anticipate tomorrow's opportunities. Technology enables us to create spaces that are intuitive, adaptive, and deeply human," he explains.

Sarah's journey into the world of design

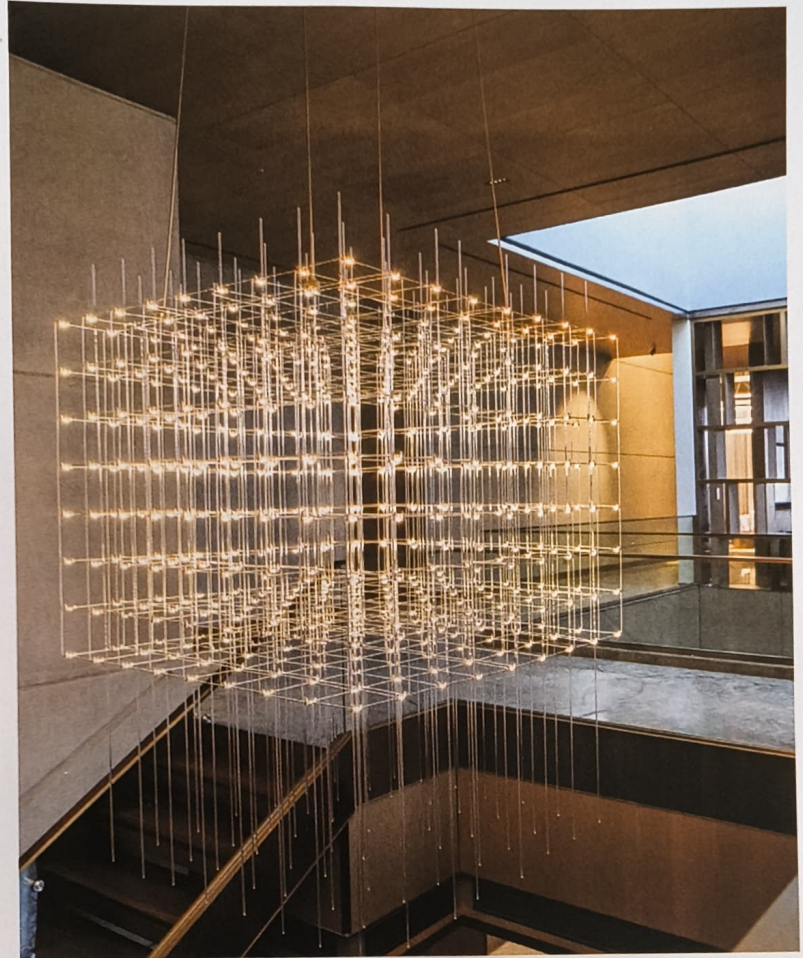

Sarah Choudhary

Sahir Choudhary

began at Central Saint Martins (CSM), London, where she stood out for her prowess in spatial design. She refined her craft at the New York School of Interior Design (NYSID) where she specialised in hospitality design. Outside of her architectural ventures, her passion for painting and sketching adds a creative dimension to many of her projects. "Design is about crafting moments. Every space has a story, and my goal is to make that story unforgettable," she shares.

LEADING HABITAT ARCHITECTS TOGETHER

At Habitat Architects, Sahir and Sarah form a powerhouse duo, seamlessly blending tech-savvy innovation with artistic flair. Sahir's technological foresight and urban design expertise complements Sarah's artistic sensibility and hospitality focus, creating a partnership that bridges innovation and tradition. Their ability to integrate global trends with local craftsmanship ensures that Habitat

Architects resonates with a diverse audience.

Their work ranges from smart residential spaces to sustainable urban projects which are designed to foster functionality. While their parents laid the foundation by integrating cultural storytelling and technical mastery into the firm's ethos, Sahir and Sarah are taking it into the future with their expertise.

THE FUTURE OF HABITAT ARCHITECTS

Sahir and Sarah are shaping the future of design with a shared commitment to create environments that are sustainable and human-centric. Their approach combines technological innovation, cultural sensitivity, and artistic creativity, creating spaces that are beautiful, while embracing modern luxury.

"Design is not static," Sarah says. "It evolves with people, culture, and technology. At Habitat Architects, we're creating spaces that inspire, sustain, and connect."
